

100 WAYS TO CELEBRATE THE 100 YEARS

THEME

Hundred years of leadership in quality healthcare delivery, through training, research, innovation, and partnership

KBTH Strategic Ambition

KBTH envisions itself to be pivotal in Ghana's healthcare industry. It has therefore reviewed its medium-term strategic ambition to position the hospital as a true industry leader

Our Mission: Providing excellent healthcare services, training, research and advocacy

This is our story so far...

Dr. Opoku Ware Ampomah
Chief Executive Officer
Korle Bu Teaching Hospital

As the premier Teaching Hospital in Ghana and the third largest in Africa, the Korle Bu Teaching Hospital has gone through several transformational phases from 1923 to 2023.

Teaching Hospitals are mandated to provide Service delivery, Training, and Research. Successive managements have made a conscious effort to promote health and provide advanced health services to people who need it irrespective of status, tribe or creed. This has resulted in a continual expansion of the range of services provided by the institution.

The hospital has adopted the WHO Health Systems' Framework and the Balanced Scorecard Framework to aid our collective effort to improve our leadership and governance, service delivery, human resource, health

financing, health technology, health information, community participation, partnership and research.

For a period of one year, beginning from October 2023 to October 2024, we are undertaking 100 activities/projects to intensify our collective effort to make Korle Bu better and also to acknowledge those whose contributions have brought us thus far.

We welcome you on board to support Korle Bu Teaching Hospital's agenda of providing advanced, quality care to our clients as we forge ahead towards achieving better care outcomes, so as to ensure that the country achieves the Sustainable Development Goals and Universal Health Coverage (UHC), leaving no one behind.
